Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, and 4-9, drawn to a nucleic acid comprising SEQ ID NO: 1, a host cell and transgenic plant comprising said nucleic acid, and a method of altering circadian rhythms and flowering in a plant, classified in class 800, subclass 290, for example.
 - II. Claim 3, drawn to a polypeptide comprising SEQ ID NO: 2, classified in class 530, subclass 350, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and modes of operation. The nucleic acid sequence and method of Group I do not require the polypeptide of Group II, and vice versa. Further, the nucleic acid and amino acid sequences can be produced by alternative means, such as chemical synthesis.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and because these inventions have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1638

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
